The Adams County Nursery and Fruit Farms

ESTABLISHED 1905

Growers of Good Trees
Sold Direct from Nursery to the Planter

PRICES EFFECTIVE FOR DELIVERY SPRING 1943

Aspers, Penna.
February 10, 1943

Dear Friends & Customers:

It is a pleasure to again use this space to express our thanks and appreciation for the patronage you have given us this past year. We are working under difficulties, as most of you are, due to war conditions. We have spared no expense in producing for you trees that are thrifty, healthy and true to name.

We have enjoyed one of the best growing seasons in years and are in a position to furnish you with trees that have an exceptional thrifty growth. We wish it were possible for all of you that are planning to plant an orchard this Spring to see these trees as they now stand in the nursery rows. We have been producing fine trees since 1905, but I believe this is one of the finest blocks we have ever produced.

Our trees are produced in the leading fruit County of Pennsylvania. We have approximately 250 Acres planted to commercial orchards. Our orchard experience is of assistance in producing fine nursery trees.

Plan now for the future by planting an orchard. Care for the orchards you now have as fruit is a very necessary article of food for the health of our Nation and our Allies in this war and the Peace we hope will follow soon.

Place your order as early as possible. We try to fill orders in the order they are received. Make your selection from this catalogue and mail it soon.

Yours for a thrifty orchard.
Adams County Nursery & Fruit Farms,
H. G. Baugher, Proprietor

The Adams County Nursery and Fruit Farms

H. G. BAUGHER, Aspers P. O., Penna.

BENDERSVILLE STATION

A VIEW OF OUR LARGE PACKING HOUSE

THE FINEST FRUIT TREES GROWN AT ROCK BOTTOM PRICES

Our fruit trees are grown on the best grade whole root seedlings right here in the leading fruit county of Pennsylvania. In addition the soil is especially prepared in advance to planting the seedlings, thus providing the richest fruit soil available. I supervise the cutting of buds and the best of care is taken to have every variety true to name. My selling price is only a little above the actual cost of growing, giving the purchaser the benefit of lowest prices. My Nursery is inspected every year by State Nursery Inspectors, to see that all nursery stock is clean and healthy. A Certificate of Inspection accompanies all purchases.

This price list contains a list of the best fruits for this latitude and their descriptions are not exaggerated or misleading.

Come to the Nursery, if you can do so, make your selection, and take them with you in your automobile or truck and save 1¢ per tree. Otherwise, we will ship them to you by Express, Freight or Parcel Post, as you may wish. My Nursery is located one-half mile from Bendersville railroad station, $\frac{1}{2}$ mi. south of Aspers post office, 35 miles from Harrisburg, 12 miles from Gettysburg, on the Harrisburg-Gettysburg State Road via Carlisle, Route No. 34, all hard road.

I have ideal shipping facilities—a large packing-house on a siding of the Reading Railroad. The trees are carefully packed and should reach the purchaser in the best of condition.

The greatest of care is taken to have all trees, etc., true to label. Any proving not so will be replaced or purchase price refunded, upon proper proof. In no case shall my maximum responsibility exceed the original amount paid. Professor W. H. Upshall (a noted authority on identification of stone fruit varieties) of the Vineland Experiment Station, Ontario, Canada, has inspected and pronounced our fruit trees, true to name as they stand in the nursery rows.

All orders are accepted on the condition that they shall be void should any injury befall the stock from hail, storm, or other causes beyond our control.

Order early and be sure to get the varieties and quantity you want.

PACKING OF NURSERY STOCK

All packing will be done in boxes or bales, thus protecting the roots and trees well in shipping. No charge is made for packing or delivery to railroad at Bendersville Station.

SHIPPING OF NURSERY STOCK

The spring shipment of nursery stock begins about March 15 to April 1, depending on an early or late season. Fall shipments about November 15th. Purchasers are requested to state whether they wish stock shipped by freight or express.

PLANTING OF FRUIT TREES

It is a wise thing to choose land that is well-drained because no fruit trees can thrive in a damp, soggy soil. Plum and quince will stand a greater amount of dampness than other fruits, but they are better if they do not have to contend with unfavorable drainage. The best-drained soil is that whose natural elevation conduces to the rapid elimination of surplus water. A gently sloping hillside, free from hollows or swales where late frosts may not linger, affords the best site. Peaches ought to get the highest locations, because there is less danger from late spring frosts on high ground than on low.

If possible, the land should be prepared as for a good crop of grain, although heavy fertilization is not essential if soil is reasonably fertile.

Have the holes dug in the proper places for the trees, large enough to receive the roots comfortably without bending or twisting them. Stake out the orchard in advance to be sure that the holes get dug in the right places.

When the trees arrive from the nursery, open the package and plant them immediately if it is possible. Be very careful to keep the roots covered to prevent their drying out. In planting, set the trees upright near the center of the holes, spread out the roots evenly, and work fine earth in among them, making sure that they are packed in close contact with the soil. If small air-pockets remain about the roots they will extract moisture from them, so injuring them that the trees may die.

In setting out young trees, place them a little deeper than they grew in the nursery. The earthmark on the base of the stem is the best guide in this.

If it is impossible to plant the trees immediately, dig them in. To do this, dig a trench, shovel width and depth, and long enough to hold the roots when they are placed side by side upright. Shift fine earth over the roots, and when the trench is half full, soak them with water and pile on the remainder of the earth. In this temporary planting the trees will keep in good condition for a week or two.

CARE OF FRUIT TREES

Newly planted trees should be well cultivated the first season, to conserve moisture and to keep down weeds and grass. It is not always good economy to intercrop with grass, small fruits, or grain, unless the young trees are making extraordinary strong growth. When the trees are well established, the spaces between the rows may be used for other crops for a few years, until the trees need the space; but while making their initial growth the trees ought not have to compete with other crops for the plant-food in the ground.

One of the most important items in the care of Fruit Trees is to see that they are trained right from the start. Our two-year-old sizes have the heads already formed, with three to five scaffold limbs well arranged along the trunk to support the head. These trees should be cut back, leaving just the scaffold limbs shortened to the point where it is desired to have the head of the tree.

One-year trees, or whips, should be trimmed to smooth, straight stems, cutting them squarely off at the distance from the ground at which it is desired to have them branch. Usually, apples, plums, pears, and cherries are headed a little higher than peaches, which ought to be encouraged to branch as low as possible. The after-pruning is a matter which requires some knowledge of tree-growth and habit, as well as the purpose for which the trees are grown.

LEADING VARIETIES OF PEACH TREES

Good thrifty one year old trees.

Prices listed are per tree.

	1-9	10-49	50-299	300-599	600 or more
5 to 6 feet, 11/16 In. up	\$.80	.65	.45	.35	.30
4 to 5 feet, 9-11/16 In.60	.50	.40	.30	.25
3 to 4 feet, 7-9/16 In.50	.40	.30	.25	.20
2 to 3 feet, 5-7/16 In.40	.30	.25	.20	.15
2 to 3 feet, 1/4-5/16 In.35	.25	.20	.17	.12

Different varieties of peaches may be ordered to get quantity price, but no other fruits may be included.

REMEMBER, the Net Cash Price will be 1¢ per tree less than above prices if you call at our nursery for your trees.

These leading varieties of Peach are listed, just as near as possible, in their order of ripening.

GREENSBORO

An early, white-fleshed Peach that ranks high because of its showy fruit and its large, vigorous, healthy, early-bearing, and prolific trees. It is considered one of the best early freestone varieties as it ripens July 10 to 15. Fine market Peach.

ORIOLE

A fine quality yellow freestone peach ripening a few days ahead of Cumberland. Tree and buds very hardy, fruit high colored, medium to large size. Introduced by N. J. Experiment Station 1925.

CUMBERLAND

An excellent white fleshed peach. Fruit large, attractive color. Considered by many growers to be equal or better than Belle of Georgia, ripening a few days earlier than Golden Jubilee.

GOLDEN JUBILEE

Developed and introduced by the New Jersey Experiment Station. A yellow, early freestone Peach, ripening about three weeks before Elberta, and of good quality. One of the best new varieties.

TRIOGEM (N. J. 70)

A red all over, yellow freestone, ripening about two days later than Golden Jubilee. It is superior to the Golden Jubilee because it is firmer, ripens slowly, ships well, colors much better, peaches on the inside of the tree are well colored, and has high quality. Fruit buds are very hardy and set heavily causing thinning. Growers claim this to be one of Best New Jersey introductions.

RADIANCE

A seedling cross between Belle of Georgia and Greensboro. Large, white-fleshed, freestone Peach. Ripens July to August 1.

PRIMROSE

A seedling of Belle of Georgia crossed with Elberta. A large yellow fleshed peach, freestone and of good quality, ripening with Belle of Georgia. Recommended as a yellow fleshed peach to replace Belle and precede Elberta. Recommended for planting for nearby markets.

HALE-HAVEN

Yellow, freestone, large, high red color, firm, good flavor. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. Very hardy in fruit bud and a heavy bearer. Ripens about 2 weeks before Elberta. Hale-Haven is a new variety, being a cross between the famous J. H. Hale and the well known new variety, South Haven, being originated by the Michigan Experimental Station.

SOUTH HAVEN

A large yellow freestone, ripening about ten days before Elberta. A profitable commercial Peach, originating in Michigan.

GOLDEN EAST (N. J. 87)

A large oval shaped yellow peach, usually freestone, high colored, ripening with Hiley or two weeks before Elberta.

BELLE OF GEORGIA

Very large Peach with red cheek; flesh white and firm, of excellent flavor; fine shipper. Ripens August 1 to 15.

VIMY

A Canadian introduction. Fruit very large. Yellow freestone.

ELBERTA

One of the greatest commercial yellow Peaches known. Good shipper. Tree hardy and good grower. Ripens August 20 to September 1.

J. H. HALE

Yellow; very large in size and globular in shape; skin thick, smooth and without fuzz; flesh deep yellow, fine-grained, firm, of extra quality; good shipper. It ripens a little ahead of the Elberta, and brings highest prices.

SHIPPER'S LATE RED

A large highly colored Peach. Very hardy, yellow fleshed and freestone of good quality. Ripens just after Hale and Elberta.

GAGE ELBERTA

A very hardy, disease resistant Elberta type peach. This variety is being planted by commercial planters in large quantities because of its hardiness and good bearing qualities. Fruit hard to distinguish from Elberta. Ripens two to three days later than Elberta.

BRACKETT

A fine yellow freestone Peach. Similar to Elberta, but of better flavor. A good commercial variety. A good shipper. Ripens about a week later than Elberta.

AFTERGLO (N. J. 84)

A large high colored yellow freestone peach ripening three to five days after Elberta. Red coloring carries through the flesh, it being especially red about the pit. A variety that appears hardy and worthy of trial.

LATE ELBERTA

(Sometimes called the Rex.) One of the best of the late varieties, ripening about three weeks after Elberta. It is of large size, with yellow flesh. Very desirable market Peach.

LEADING VARIETIES OF APPLE TREES

Prices On Select Apple Trees. As Fine As Any Obtainable.

TWO YEAR TREES

Prices listed are per tree.

	1-9	10-49	50-299	300-599	600 or more
Extra select 5-6 ft., 11/16 In. up	\$.85	.70	.45	.40	.35
First class 4-5 ft., 9/16-11/16 In.75	.60	.40	.35	.30
First class 3-4 ft., 7/16-9/16 In.65	.50	.35	.30	.25

ONE YEAR TREES, straight whips and slightly branched.

Extra select 4-5 ft.	\$.85	.70	.45	.40	.35
First class 3-4 ft.75	.60	.40	.35	.30
First class 2-3 ft.65	.50	.35	.30	.25

Different varieties of apples may be ordered to get quantity price, but no other fruits may be included.

Write for larger quantity prices, stating varieties and amounts of each desired.

REMEMBER, the Net Cash Price will be 1¢ per tree less than above prices if you call at our nursery for your trees.

These are a fine lot of Apple trees—nice, clean, thrifty, well grown. Budded on whole root seedlings. **We invite you to compare ours with any grown.**

YELLOW TRANSPARENT

Earliest and best; white, tender, juicy, sprightly subacid; grows upright; bears when young, making good filler. Ripens July 1 to 15.

CANDY APPLE

A variety found on one of the farms on the Adams County Nursery. It is of exceedingly fine flavor and is considered one of the very finest eating Apples in commerce. Not knowing its true name (if it has one), we call it the "Candy Apple." The fruit is yellow with red streaks, and it ripens about August 1.

WEALTHY

Medium size, round or pointed almost solid red; flesh white, crisp, juicy; bears young. Ripens August 1 to 15.

SUMMER RAMBO

Very large; greenish red, striped, tender, juicy; tree strong grower. Ripens August 15 to September 15.

SMOKEHOUSE

One of the old kinds welcomed in every home. Ripens in September and can be kept in common storage late into the winter.

GRIMES GOLDEN

A good-sized yellow Apple of high quality. Ripens in September; can be kept late into the winter.

JONATHAN

Very red Apple, smooth, of good size and fine quality. Ripens in September; can be kept in common storage late in the winter.

McINTOSH

Bright, deep red; fine quality. Ripens in September and keeps late into the winter in common storage.

YELLOW DELICIOUS

A good variety, resembling the Red Delicious somewhat in shape. Ripens about same time as Grimes Golden.

STAYMAN WINESAP

Large; mostly covered with red; crisp and juicy. Tree a strong grower. Ripens in October and ready for use soon after picking; keeps late into spring.

YORK IMPERIAL

A medium to large winter Apple with yellow skin shaded red; firm, juicy subacid. An excellent canning and shipping Apple and good for export. Ripens in October.

BALDWIN

A fine winter Apple. Succeeds well in the Northeastern States.

ROME BEAUTY

Large, round, winter sort, mottled and mostly covered with red; the flavor and quality are very fine. It is also a good late keeper.

RED DELICIOUS

(Sometimes called Starks' Delicious). An excellent winter Apple. Brilliant dark red skin, shading to yellow at the blossom end, and growing somewhat in quince shape; very attractive.

PARADISE (WINTER SWEET)

Large, creamy white, rosy cheeked. One of the best sweet winter varieties.

NORTHERN SPY

Large, red winter Apple; crisp and juicy. Does well in Northern States.

WINTER RAMBO

Pale green, striped red; tender and crisp. Fine winter Apple.

CORTLAND

A cross between McIntosh and Ben Davis, inheriting the good qualities of both parents. It is a beautiful red, larger than McIntosh, and matures a month later; hangs well to the tree. It keeps late in winter.

DOUBLE RED YORK (No Extra Charge)

This is a sport of the regular York Imperial. It colors earlier and produces higher color than the regular York Imperial.

DOUBLE RED DELICIOUS (No Extra Charge)

A much higher colored fruit than the regular Delicious, coloring earlier, similar in every other respect to the regular Delicious.

DOUBLE RED STAYMAN (No Extra Charge)

Similar to the Stayman Winesap, excepting that it colors earlier and produces fruit of higher color.

X RED CRAB

This is an all red crab apple, medium size, fruit very handsome, produces a fine red jelly.

CHERRIES (Sweet)

Prices listed are per tree.

SWEET CHERRY (1 and 2 year trees)	1-9	10-49	50-299
Extra Select 5-6 ft.	\$1.00	.80	.70

BLACK TARTARIAN

Sweet. Very large, dark red Cherry, becoming black when over-ripe; juicy. Ripens in June.

GOVERNOR WOOD

Sweet. Large, light red; juicy, rich delicious. Tree healthy and productive. Ripens in June.

LAMBERT

Sweet. A fine variety, and one of the largest dark sweet Cherries. Flesh firm; rich, juicy. Tree a strong grower and enormous bearer. Ripens in July.

NAPOLEON

Sweet. Large; pale yellow or red; firm, juicy, sweet and productive. Ripens in July.

SCHMIDT'S BIGARREAU

Sweet. Fruit very large, of deep mahogany color; flesh is tender; very juicy, with a fine, rich flavor. Fruit grows in clusters. An excellent shipper; larger than Black Tartarian, and brings good prices. Ripens in middle to last of June.

WINDSOR

Sweet. Large, liver-colored fruit with remarkably firm flesh of fine quality. Tree hardy and prolific. A valuable late variety. Ripens about first of July.

YELLOW SPANISH

Sweet. Large; pale yellow, with red cheek; flesh firm, juicy, and excellent. One of the best light-colored Cherries. Vigorous and productive. Ripens middle of June.

SOUR CHERRY (1 and 2 year trees)	1-9	10-49	50-299
4-6 ft. 11/16 In. up	\$.90	.80	.60
3-4 ft. 9/16-11/16 In.80	.70	.50
2-3 ft 5/16-7/16 In.70	.60	.40

LARGE MONTMORENCY (Sour)

Sour. Large; red; productive. One of the best sour Cherries for commercial planting. Ripens in July.

ENGLISH MORELLO (Sour)

Sour. Late; very hardy, and produces heavy crops of dark red fruit of good quality and rich acid flavor. Ripens last of July.

EARLY RICHMOND (Sour)

Sour. Early Summer; heavy yielder; medium size; bright red. Tree exceptionally hardy.

QUINCES

Prices listed are per tree.

QUINCE 2 year	1-9	10-49
4-5 ft.	\$1.00	.80

ORANGE

Fruit large, bright yellow, of excellent quality. Earlier than champion.

CHAMPION

A prolific and constant bearer of oval fruit, averaging larger than Orange and ripening later. A long keeper.

PEARS

Prices listed are per tree.	1-9	10-49	50-299
2 year, 5-6 ft.	\$.90	.75	.60
2 year, 4-5 ft.80	.65	.50
2 year, 3-4 ft.70	.55	.40
1 year, 4-5 ft.80	.65	.50
1 year, 3-4 ft.70	.55	.40
1 year, 2-3 ft.60	.45	.35

BARTLETT

Large; buttery, juicy, high flavored; great bearer. This has long been considered one of the choicest canning varieties. A favorite for all uses. Ripens in August.

CLAPP'S FAVORITE

Very large; yellow and dull red skin, with russet specks; flesh melting, rich. Ripens in August.

SECKEL

Small; skin rich yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine-grained, sweet, juicy, melting, buttery. One of the richest and highest flavored Pears. Equally popular for dessert and pickling. Ripens in September.

SHELDON

A large, round, russet and red Pear of very fine quality; melting, rich, and delicious. Tree vigorous, erect and handsome; bears well. Ripens in October.

KIEFFER

Large; handsome Pear with remarkable keeping qualities. Fine for making butter and canning.

BEURRE D'ANJOU

Large; buttery, melting, rich, vinous. The best late fall and early winter Pear.

PLUMS

Prices listed are per tree.	1-9	10-49	50-299
1 and 2 years old, 4-6 ft.	\$.90	.75	.60

ABUNDANCE

One of the greatbearers. Fruits of lemon to red color, sweet and juicy. Ripening in August.

LOMBARD

A valuable market plum. Medium size, violet red, juicy. Hardy and adapted to light soils.

BURBANK

Cherry-red. Most profitable among growers for market. Ripens 10 to 14 days later than Abundance.

PLUMS (Continued)

GREEN GAGE

A fine sweet Plum when ripe, the green color then turning yellowish. Ripens September 1.

ITALIAN PRUNE (Fellenberg)

A fine commercial plum, dark purple, medium size, juicy, delicious, fine for canning or drying.

SHIROW

A large, sweet, yellow Plum; fine shipper and market sort. Ripens in August.

BRADSHAW

Very large dark violet red, flesh yellowish green, juicy and pleasant. Tree vigorous, erect and productive. Ripens August.

STANLEY PRUNE

A fine prune type plum, excellent quality, freestone, fruit large in size, dark blue skin, greenish yellow flesh, juicy and fine grained. Heavy bearer. Ripens mid-season. A New York State Experiment Station introduction.

APRICOTS

Prices listed are per tree.

1 and 2 years old, 4-6 ft. \$1.00 each

MOORPARK

A fine, rich-flavored Apricot, becoming rather large under favorable conditions. Firm and juicy. Ripening in July.

GRAPE-VINES

	Each	10	100
Two year, No. 1.	\$.35	1.65	9.00

Grape-vines should be planted 6 to 8 feet apart, in rows 8 feet apart.

BRIGHTON

Large berries of high quality. One of the most popular reds.

CONCORD

The leading market, vineyard, and home-garden variety. Dark blue berries of fine quality.

WORDEN

Resembles Concord but is sweeter, larger in bunch and berry, and a week to ten days earlier than that variety.

NIAGARA

The standard white Grape. It ripens with Concord but the bunches and berries are larger; very sweet.

MOORE'S EARLY

Bunch medium; berry large, round; vine exceedingly hardy. Ripens three weeks ahead of the Concord, making it desirable for early market.

CACO

The new red Grape has a most delicious flavor and is of the highest quality.

Write for special prices on 500 or more, naming quantities of each desired.

RASPBERRIES

.85¢ for 10

\$4.50 per 100

\$28.00 per 1000

CUMBERLAND

A healthy, vigorous grower, sending up stout, stalky, well-branched canes that produce immense crops of very large, firm black berries. The most profitable market variety of its class. Ripens in mid-season.

ST. REGIS

A genuine, practical, profitable, everbearing red Raspberry. Fruit begins to ripen with the earliest and continues on young canes to October.

LATHAM

A new, very hardy, heavy bearing variety. Considered most profitable of the red varieties.

BLACKBERRIES

.85¢ for 10

\$4.50 per 100

\$28.00 per 1000

ELDORADO

Recommended as the best commercial berry. Jet-black, sweet and pleasant to the taste. Endures the winter well.

ASPARAGUS

LARGE 2-YEAR ROOTS:

2 years No. 1, .85¢ for 25

\$2.00 per 100

\$10.00 per 1000

Plant in a trench in rich soil, and set 1 to 1½ feet apart, placing crown 2 inches below surface.

WASHINGTON STRAIN

A new rust-proof variety of large size and excellent quality. A profitable sort.

NORWAY MAPLE

	Each
8 to 10 ft. nicely branched	\$4.00
10 to 12 ft. nicely branched	\$5.00

The Norway Maple makes the finest of shade trees for city or country planting.

I have a large block of Norway Maples ranging in size from 1¼" to 4" caliper straight, well formed trees. Write for special prices on quantity.

NUTS

ENGLISH WALNUT

3 to 4 foot trees **\$1.50 Each**

A fine, lofty growing tree, with handsome, spreading head. It produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home-garden should have an English Walnut tree making nice shade.

CHINESE CHESTNUT

3 to 4 foot trees **\$1.50 Each**

An early bearing Chestnut showing excellent resistance to blight.

TERMS

Cash with order, or satisfactory reference. When placing an order for future delivery, send a deposit of 25% with order and balance before date of shipment or else order will be sent C. O. D.

AN EXTRA SERVICE FOR YOUR PROTECTION

We have employed the services of Dr. W. H. Upshall, of Vineland Experiment Station, Ontario, Canada and Dr. J. K. Shaw, A. P. French, O. C. Roberts and L. Southwick of the Massachusetts State College to examine our fruit tree nursery stock for trueness to name. This additional expense is for your protection as a customer. No expense has been spared to enable us to offer our customers trees that they can plant with assurance that they will be true to name.

REFERENCES AS TO MY RELIABILITY

I refer you to The Gettysburg National Bank, Gettysburg, Pa., The Bigler-ville National Bank, Biglerville, Pa., or to any of my thousands of pleased customers.

Come to the nursery if you can in your car or truck. Make your selection and take the trees with you. To reach the nursery from Harrisburg, take Route 11 to Carlisle, then Route 34 through Mount Holly Springs and on to Aspers, Pa., all hard roads and about 35 miles from Harrisburg. From Gettysburg take Route 34 to Aspers, Pa., only about 12 miles and all hard roads. You save 1¢ per tree by calling at the nursery and taking the trees with you.

VISITORS WELCOME

Visitors are always welcome. Come and I will be glad to show you around. My many years of experience in growing nursery stock and orchard experience have taught me a lot of things you should know. **No business transacted on Sundays.**

DISEASE FREE STOCK

All nursery stock has been officially inspected by a state inspector and a Certificate of inspection is attached to each shipment.

A Few of the Reasons Why You Should Buy Our Trees

1. **We dig our trees in the Spring and do not store them over the Winter.**
2. **We use Deisel Power to dig our trees. This method gives them an excellent root system.**
3. **Our trees have been examined and pronounced true to name by leading authorities in Fruit Tree Identification.**
4. **I have been producing fine fruit trees for the past 38 years.**
5. **We are located in the largest fruit growing county of Penna.**
6. **We grow and sell direct from the Nursery to the Planter.**

DISTANCES APART FOR PLANTING
